1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I; Claims 33-50 are drawn to a method of manufacturing a thin film magnetic read head&system, classified in Class 29, subclass 603.08.

Group II; Claim 1-32 are drawn to a thin film magnetic read head&system, classified in Class 360, subclass 317.

The inventions are distinct, each from the other because of the following reasons:

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process. See MPEP § 806.05(f). In the instant case the article can be fabricated using different steps which do not follow the same chronological order of the claimed steps and/or may omit certain step(s).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by
